CONCEPT NOTE

Blended learning is an integration of interactive technology with conventional classroom settings. It is a midpoint between classroom teaching and a complete online learning environment. It gives more flexibility to customize the learning experience for students and motivate them to use multiple learning styles. This Faculty Development Programme will explore the different ways to implement Blended Learning. It is important to understand that Blended Learning is not simply adding technology to the classroom. Rather, it has to be integrated into everyday teaching, thereby emphasizing on re-thinking the current pedagogical approach. The programme intends to explore the different models of blended learning and dive into key issues that impact students, teachers, and institutions of Higher Education. Specifically, we plan to look at these issues by integrating the conceptual backgrounds and different schools of Blended Learning with the technological applications used for building an effective blended learning curriculum.

THEMATICS
