## CONCEPT NOTE

India's National Education Policy 2020 (NEP 2020) makes a paradigm shift in conceptualizing education as a means to equip students with skills suited for the 21st century and not just for making them employable. It calls for deep rethinking and redesigning of academic systems along with parallel changes in administrative and regulatory systems. When done with participation of all concerned - institutional leadership, faculty, administrators, and students- the policy has the potential to align the goals of quality with affordability; academic degrees with job readiness; and national ambitions with individual gains.

The current programme aims to train the faculty members in the new knowledge and skills which is required to move beyond the scope of traditional classroom and to implement novel approaches to their teaching pedagogy. Overall, the current Faculty Development Programme is an effort to probe into the different limitations which are witnessed by faculties of Higher Education. It also aims to train the faculty members in the new knowledge and skills which is required to move beyond the scope of traditional classroom.
